Small depth – big comfort

KEUCO ROYAL LUMOS mirror cabinet available as a flatter model

KEUCO is known as a competence provider for high-quality mirror cabinets. Here, strong, concise design meets the finest workmanship. Those who value quality in bathroom design and the use of durable materials will find the right model for every room situation in the large KEUCO portfolio.

The ROYAL LUMOS is available with a second depth of a slim 130 mm, instead of the regular 165 mm. As a wall-mounted model, the flatter mirror cabinet looks more discreet. Despite the shallower depth, even large care products have enough space in the high-quality aluminium cabinet. Despite the shallower depth, even large care products have enough space in the high-quality aluminium corpus. This version of the ROYAL LUMOS mirror cabinet is ideal for smaller bathrooms or the guest bathroom. The exceptional recessed version hides its storage space in the wall. Thanks to the reduced depth, the mirror cabinet can also be used in thin walls. The lighter weight is an advantage for experts when it comes to installation.

Lots of advantages - but the ROYAL LUMOS mirror cabinets made by KEUCO can do even more: The three-sided LED lighting frames the ROYAL LUMOS like a picture and makes it an attractive solitary specimen. As the brightest mirror cabinet in the KEUCO range, with various types of lighting and easy operation, the ROYAL LUMOS is top shop for every bathroom. It provides perfect lighting - no matter whether for the entire room, for the face or for atmospheric accent lighting of the fitting and washbasin. Thanks to different light sources for main lighting and indirect lighting, the ROYAL LUMOS mirror cabinet offers endless options for any time of day and mood.

The intuitively operated sensor control enables the light sources to be selected and their light intensity to be dimmed, as well as the light colour to be continuously adjusted - from cosy warm white light with 2700 Kelvin to daylight white light at 6500 Kelvin.

PRESS INFORMATION

High-quality interior furnishing with soft-close hinges, an illuminated storage compartment with non-slip and easy-to-clean linoleum inlay, mirrored rear wall, mirrored revolving doors on the inside and power sockets again make the ROYAL LUMOS a popular daily companion to have in the bathroom. The ROYAL LUMOS is optionally equipped with integrated heating in the mirror doors. This means that a fog-free view after showering is always guaranteed - even in bathrooms without a window.

Available in many different widths, from 650 to 1400 mm, the ROYAL LUMOS mirror cabinet opens up individual design options for both big and small bathrooms. Depending on the width, it is equipped with up to three mirrored doors and offers the perfect combination together with single and double washbasins. The wall-mounted and recessed versions offer plenty of scope for modern bathroom architecture.

To add to the most attractive design and the open storage compartment, the ROYAL LUMOS mirror cabinet is also available as a model with a particularly large mirror surface, hiding the compartment behind it.

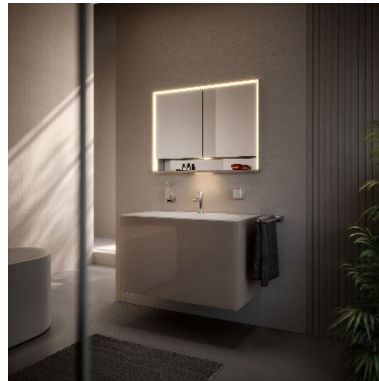

For longevity: All KEUCO mirror cabinets have a particularly stable anodised aluminium body with a most exceptional and long-lasting quality. The reliable material is particularly suitable for the temperature and humidity fluctuations in the bathroom, as aluminium has a high corrosion resistance and is resistant to scratches and abrasion.
